

# HumiTech

Part of Munters Group

## Humidifier & Evaporative Cooling Specialists

One of Europe's most experienced humidification teams

### Services we offer

We are a dedicated professional team of highly skilled and trained engineers providing humidifier servicing solutions.

We service, maintain, install and commission all makes and models of humidifiers & evaporative coolers.

For over 20 years, HumiTech has been the chosen supplier for all humidification applications across a range of industries and applications. From small, domestic clients through to some of the UK's largest and most well-known museums, universities, offices, commercial properties, data centres and manufacturing sites, our team of professional and reliable engineers are there to support you from concept to completion and beyond.

## Service and Maintenance

The HumiTech service and maintenance team comprises of engineers with decades of experience dedicated to servicing humidifiers. This wealth of experience and knowledge is backed-up by our team of fully trained engineers, enabling HumiTech to offer a service that cannot be beaten.

HumiTech will ensure your humidification equipment is maintained to the highest standards while helping to reduce operational costs.

### We provide:

- Tailored service agreements
- Service call-outs
- Reconditioning and repairs
- Spare parts - next day delivery available\*
- Free site surveys
- Remote monitoring

\*Selected in-stock items only.

## Which Humidifier?

At HumiTech we understand there are many considerations that affect which type of humidifier is right for you. We are skilled at humidifier selection, as well as offering full project surveys, pre-installation meetings and assisting with Health & Safety.

### Our portfolio of humidifiers includes:

- evaporative humidifiers
- steam humidifiers
- electrode humidifiers
- resistive humidifiers
- gas-fired humidifiers
- spray humidifiers

## Looking for a more energy efficient solution?

Replacing an existing humidifier for a more environmentally friendly model isn't as simple as it sounds. In some instances, replacement costs can make purchasing new equipment unfeasible. HumiTech's service solutions make it possible to reduce your carbon footprint, and reduce running costs of the humidifiers you already have by ensuring they are run more efficiently.

## Why it's important to service your humidifier

Heavily scaled cylinders will lead to costly breakdowns and even catastrophic failure!
